Area	Status
Mail	**1 action item:** expense report due **17 Jan 2026 EOD**. 1 PR merged. The rest is alert noise.
Calendar	One meeting today at 11:00 AM IST. Not on call. No pending invites in the next 7 days.
Headlines	3 world and 2 India stories below, with images and links.
Question	LeetCode 1 · Two Sum · Easy · Hash Table
Job	Example Corp · Backend Engineer · Bengaluru (plus 2 other options)

Mail

IMPORTANT · ACTION NEEDED BY 17 JAN 2026, EOD

Expense report for December must be filed before payroll closes

From: Finance Team (Example Corp) <finance@example.com> · Cc: manager@example.com · Received 15 Jan 2026, 9:02 AM IST (earlier copy on 14 Jan).

Why: the expense tool closes the December window on 17 January, so anything not filed by then rolls to the next cycle.

Steps:

1. Collect receipts for every claim in the **expense portal**.
2. Submit the report and get approval from your reporting manager.
3. All approvals must be completed by **17 January 2026, EOD**. **Late claims are not accepted after the deadline.**

Question of the day

1. Two Sum · Easy
Problem: https://leetcode.com/problems/two-sum/
In simple words: You get a list of numbers and a target. Find the two positions whose numbers add up to the target.
Example: Input: `nums = [2,7,11,15], target = 9` → Output: `[0,1]` (2 + 7 = 9). Another: `[3,2,4], 6` → `[1,2]`.
Constraints (from a mirror; confirm on LeetCode): 2 ≤ length ≤ 10^4, exactly one valid answer.
Topics: Array, Hash Table · **Companies:** Example Corp, Sample Inc · **Why today:** day 15 of the year, so the topic rotation lands on Hash Table.
Study guide (hash maps): https://leetcode.com/discuss/study-guide/000/hash-map-guide
Full problem list: https://leetcode.com/problemset/

Job of the day · Example Careers

Backend Engineer · Bengaluru, Karnataka, India · posted about 2 days ago (around 13 Jan 2026)
Apply / details: https://careers.example.com/jobs/results/1001
Minimum qualifications: Bachelor's degree or equivalent practical experience · 3 years of software development in one or more programming languages · 2 years with distributed systems.
Why it fits you: backend engineer with Go and MySQL on a consumer app; distributed systems match your background.
